

Parker Trail

The Parker Trail is a predominantly single track trail that starts 350 meters up the Ridge Trail from the Longhouse, at the junction of the L'ill Loop, China Loop, K9 and the Ridge Trail (see bike map in map section of website). The trail is just under 8 kilometers long and ends at the China Ridge cabin. It's generally a novice trail with some brief, low intermediate sections.

It's an uphill pull to the cabin, with the toughest climbing coming in the first 2.5 kilometers. The trail rides best from the China Ridge cabin back towards the Longhouse. As a result, many riders will ride out to the cabin on the Ridge Trail (ski trail) and ride the Parker trail downhill from the cabin back to the Longhouse and main parking lot.

The trail is marked with blue "Parker" signs and with blue flagging tape and can also be found on Trailforks.
